PROFESSIONAL SUMMARY

B.Tech Computer Science graduate (2025) with 6 months of professional experience as a Software Engineer at Aram Analytics. Proficient in full-stack web development, Python, and AI-powered application development. Demonstrated ability to integrate REST APIs, automate workflows using AI tools, and design scalable front-end interfaces with strong UI/UX design fundamentals.

TECHNICAL SKILLS

Languages: Java, HTML5, CSS3, JavaScript (ES6+), Python
Frameworks & Libraries: React.js (basic), Bootstrap, WordPress, Node.js (basic)
AI & Automation Tools: LangChain, LlamaIndex, OpenAI API, Mistral, Claude AI, UiPath, Vercel V0
Databases: MySQL, MongoDB, Oracle APEX, Pinecone, ChromaDB
Machine Learning: scikit-learn, pandas, NumPy, sentence-transformers, Regression Modeling, Feature Engineering
UI/UX & Design Tools: Figma, Sketch, Adobe XD
Developer Tools & Platforms: Git, GitHub, VS Code, Vercel, REST APIs, CMS (WordPress)
Soft Skills: Cross-functional Collaboration, Agile Workflow, Technical Documentation, Problem Solving

WORK EXPERIENCE

Software Engineer *Nov 2025 – May 2026*
Aram Analytics *Tenkasi, India | 6 Months*

- Developed and maintained AI-powered web applications using HTML5, CSS3, JavaScript, and modern AI tools, contributing to 3 production-ready product features
- Integrated REST APIs and AI automation workflows (Claude AI, UiPath), reducing manual processing time by ~40% across internal operations
- Collaborated with cross-functional product and design teams in an Agile environment to build and deploy scalable, responsive web features
- Participated in code reviews, documented technical specifications, and maintained version control using Git and GitHub

AI RESEARCH

Personal AI & RAG Research *Ongoing*

- Designed and managed a RAG pipeline using LangChain and LlamaIndex, integrating OpenAI and Mistral APIs to deliver context-aware responses grounded in custom knowledge sources
- Built a personal AI assistant bot using LangChain memory modules and the OpenAI API, enabling context-persistent, highly personalized responses from individualized user data
- Experimented with Pinecone and ChromaDB as vector stores, using OpenAI text-embedding-ada-002 and sentence-transformers to optimize retrieval accuracy and response relevance

INTERNSHIPS

Web Developer Intern *Duration: 4 Weeks*
GSUS Star Solutions *Rajapalayam*

- Built and deployed 2+ responsive web pages using WordPress and XAMPP, improving site load consistency and cross-browser compatibility
- Collaborated with the development team to debug and resolve front-end issues, reducing reported UI bugs by ~30%
- Gained hands-on experience in web hosting, CMS customisation, domain configuration, and cross-browser testing

UX Developer Intern *Duration: 2 Months*
Wisright Technologies *Chennai*

- Designed and prototyped 5+ user interface screens using Figma following UX best practices including accessibility and visual hierarchy

- Conducted user research and usability testing sessions, resulting in 20% improvement in navigation flow clarity
- Collaborated with front-end developers to ensure pixel-perfect, responsive implementation of UI designs

PROJECTS

Car Price Prediction | Python, Machine Learning, pandas, scikit-learn

- Built an ML regression model to predict used car prices with ~85% accuracy trained on a dataset of 10,000+ records
- Applied advanced feature engineering and data cleaning pipelines using pandas and NumPy, improving model performance by 15%
- Evaluated multiple regression algorithms (Linear, Ridge, Lasso) and selected best-fit model based on RMSE and R^2 metrics

Car Rental Management System | Oracle APEX, SQL

- Developed a full-featured car rental web application using Oracle APEX supporting booking workflows, inventory tracking, and user management
- Designed normalized relational database schema managing 500+ records for vehicles, customers, and reservations

Ocean Garden | HTML5, CSS3, JavaScript

- Designed and built a responsive multi-page website featuring CSS animations, interactive UI components, and mobile-first layout
- Optimised assets and layout for cross-device performance and fast load times

Amazon Clone | HTML5, CSS3

- Replicated Amazon's e-commerce UI with pixel-perfect product listing, navigation bar, and cart interface using semantic HTML and CSS Flexbox/Grid

EDUCATION

Bachelor of Technology – Computer Science & Engineering *2021 – 2025*
Ramco Institute of Technology, Tamil Nadu *CGPA: 7.12*

Higher Secondary Certificate (HSC) *Score: 79%*
Nadar Higher Secondary School

Secondary School Leaving Certificate (SSLC) *Score: 71%*
Nadar Higher Secondary School

CERTIFICATIONS

- Full Stack Development – Jspiders, Bangalore (3 Months)
- Build AI-Powered Apps – Code With Mosh
- Front End Development – Great Learning
- Foundation of UX Design – Coursera
- Artificial Intelligence in App Creation – Udemy
- Email Automation with Studio – UiPath
- Digital Marketing Introduction – Great Learning

AREAS OF INTEREST

Web Development | Artificial Intelligence & Machine Learning | UI/UX Design | Cloud Computing | Networking

ACTIVITIES & PARTICIPATION

- NASA Space Apps Challenge – AAA College of Engineering (Hackathon Participant)
- Paper Presentation – Karpagam College of Engineering
- Technical Quiz – Mepco Schlenk Engineering College
- IoT Workshop – Ramco Institute of Technology
- Coding Hackathon – Ramco Institute of Technology
- ACM Algorithm Writing Competition – Ramco Institute of Technology
